

JOB GUIDE – Water Hygiene Engineer

About Dantek

Dantek Environmental Services (UK) LTD is a Bristol based water and air hygiene services supplier. Dantek was incorporated in 2003 and is a previous regional finalist in the Brave small business of the year awards. We currently employ 16 people and have maintained 30% year on year organic growth since start-up.

Dantek are niche market specialists operating in the building services sector. We provide solutions to statutory health and safety compliance issues such as the control and prevention of Legionnaires' disease and the provision, maintenance and monitoring of indoor air quality. In essence we are a field based service organisation in a business to business environment. We are signatories to the Legionella control associations' code of conduct which is the recognised trade body for what we do.

The directors have a combined 25 years experience in the water treatment and building services sector all having previously worked for market leading corporations.

Dantek is built on a vision of providing exceptional service and value for money to our customers. We achieve this by being passionate that our engineers are the best trained, best equipped and best presented in our industry.

Dantek are an equal opportunities employer.

Hours

Monday to Friday 8.30 – 5.30pm

The Job is field based with nationwide coverage. Approximately 80% of our business base is in the South West/ South Wales area.

The role will be based and managed from Unit 2, Avonbank Industrial Estate, Avonmouth, Bristol, BS11 9DE

Candidate attributes.

The role of a Water Hygiene Engineer is business critical to the ongoing success of Dantek. They are the first impression many people get of the company, they uphold the company's image and reputation. The work is varied and the environment changes daily, this presents both challenges and freedom's. The ideal candidate must have the confidence to operate in an environment where job details may not be known in advance, and obstacles arise on a daily basis. Obstacles can range from the sundry (no parking on-site or difficult security guards) to the serious (unsafe access or possible plant failure). The right candidate will have the intelligence and intuition to solve the sundry issues without help and to identify and call for help on the serious issues.

MUST HAVE

- Enthusiasm about the company and the job
- Honesty and integrity for both customers & colleagues
- Ability to work well unsupervised, overcoming challenges to get the job done
- Positive, 'what can I do for you' attitude
- Conscientious work ethic
- 2 years minimum experience field based roles
- Ability to discuss technical issues with confidence
- Strong literacy and numeracy, minimum GCSE C or above Maths & English
- Capable of physical work, lifting, carrying and climbing
- No fear of heights or confined spaces
- Strong customer service focus
- Full current UK driving Licence

DESIRABLE BUT NOT ESSENTIAL

- 2 years minimum experience field based Legionella control positions
- Solid understanding of the ACoP L8
- Understanding of water treatment plant (Water softeners, Dosage & control equipment)
- Plumbing experience
- City and Guilds (BS04) risk assessment certificate
- Confined Spaces certificate
- Current CSCS Card
