

# L8 & HSG274 ...one year on

## A ONE DAY CONFERENCE

HSE's revised ACOP L8 and HSG274 were published over a year ago.

- What changes have these control documents made in practice?
- Have any improvements been identified?
- What measures do we need to consider for the future?

A number of new initiatives were developed following feedback from the various stakeholder events in 2014 and these will be reported on by members of the HSE and WMSoc working parties.

### PROGRAMME

- |                      |                                                                                                                                                                                                                        |
