

## **Legionella Risk Assessor**

Dantek are leading providers of Legionella prevention services, and we are looking for a talented Legionella Risk Assessor to join our experienced team.

We are a small team of dedicated professionals who are committed to helping businesses prevent the harmful effects of water in buildings. We focus on training and development and investing in our team.

This varied role offers career progression and ongoing technical training for a company with a great reputation in the legionella control industry which we have proudly built up over 22 years.

The ideal candidate will have several years of risk assessing experience, together with good practical problem-solving skills and a great attitude to customer service.

The work is varied and the environment changes daily, making this a challenging and interesting role.

### **Package**

Salary from £26K-£32K per annum DOE plus quarterly bonus

Overtime opportunities

28 days annual leave inc. bank holidays, increasing to 33 days with service.

Company car, laptop and mobile phone

Ongoing technical training

Full statutory entitlements

### **Hours**

Monday to Friday 40 hours per week

The work is field based throughout mainly the Southwest with some nationwide contracts.

The role will be based and managed from our head office in Thornbury near Bristol.

Up to 5 nights working away per month

### **Candidates must have:**

- Degree or equivalent
- City & Guilds qualification in legionella risk assessing
- AutoCad experience (or similar software)
- Extensive knowledge of ACoP L8 and HSG 274
- Excellent report writing and technical skills
- Strong problem-solving skills
- Organised and methodical approach to projects
- A full driving licence

### **Job tasks and functions**

The job is varied and includes manual, technical, administrative, and general tasks.

As a Legionella Risk Assessor, you will be responsible for conducting legionella risk assessments at a wide range of customer sites across the UK. Additionally, you will also produce schematic drawings using AutoCAD.

You will carry out site surveys to collect asset data and complete legionella risk assessment reports that comply with current HSE guidelines.

Based on risk you will recommend ways to prevent and control the risk of legionnaires' disease and provide information to our sales team for quotations for remedial recommendations and further actions required for compliance.

### **Why choose Dantek**

We are an owner managed family business who understand the importance of balancing work and home life. We all work as an effective, and highly dedicated team focused on finding solutions to solve problems. You can take comfort that you will be supported by some of the best trained people in our industry both out in the field and from the office support team.

Working within a small team of assessors, your ideas for improvements to our process are valued and solution-based problem solving is actively encouraged. You will benefit from ongoing technical training and nurture your genuine interest and curiosity in the prevention of Legionnaires' disease.
